

LocalLink

Local Monitoring and Care

This new safety and security system from Possum picks up emergency signals from remote sensors and automatically sends alerts to a family member, carer or warden by means of an InfoPager.

A range of wireless sensors e.g. smoke, door, window, movement and emergency alarms e.g. pull cord, wrist or pendant, are installed in an individuals living space. When a sensor or alarm is activated an alert is sent to a small portable pager (InfoPager) carried by a family member, carer or warden. The message on the digital display of the InfoPager advises the contact of the nature and location of the emergency.

In a residential home setting a number of attendants may each have their own pagers. Where a system is required to cover multiple rooms or buildings, an additional radio repeater unit will be required to extend the range of the InfoPager.

1 InfoPager

Optional Sensors and Alarms

- 2 Pull Cord
- 3 Smoke Alarm
- 4 PIR (Passive Infra-red) movement sensor
- 5 Pulse: wrist, pendant transmitter
- 6 Flood detector
- 7 Door and/or window Sensor
- 8 Pressure Pad
- 9 MultiLink Module

Radio Signal
