Primo!

Possum Primo! is a popular, easy to use, affordable device providing remote control of the immediate environment to give independence and reassurance for users and carers. Every Primo! system is tailored to meet the exact requirements of each individual and can be adapted as users' needs change.

Primo! can be used as a simple system providing a limited number of functions or can be configured to control a comprehensive environmental control system incorporating remote control telephones, intercoms and pc's as well as many other items.

Primo! is quick and simple to set up and enables easy user adjustments for volume brightness and scan speeds. Users may operate the Primo! by touching individual cells or any part of the screen. Alternatively, the Primo! can be operated by any specialist switch to suit the abilities of the user.

PC and Communication Aid Control

Primo!'s functionality also extends to the operation of a PC enabling access to the internet, email, electronic media and desktop applications. Primo! can also provide full access to and control of communication aids giving freedom of expression and increased independence.
