- Communication Aids*

Vivo!

The Possum Vivo!

With its unique colour screen, Possum Vivo! is an Environmental Control (EC) unit with a built-in intercom and telephone. For the first time, when used with the Possum Freedom door entry/intercom system, clients can make and receive telephone and intercom calls from anywhere in their property. Easily configurable to meet individual needs, Vivo! enables disabled and elderly people to control their environment, make telephone calls, answer and unlock the door and contact carers – all through one unit.

The Vivos! functionality also extends to speech output, allowing the user to select and play a number of recorded messages, which is especially useful for using the phone or intercom.

The Vivo! can be operated via switch access or by the remote control.
