## Wireless Telephone & Intercom System

# Freedom

### The Possum Freedom

- Freedom is a multi-room intercom, loud speaking telephone and door release system. Providing flexibility, portability and ease of installation.
- The user unit can be mounted on a wheelchair or carried enabling users to communicate from the property or garden.
- With limited internal wiring, installations are quicker and less costly.
- Battery backup enables operation after mains supply failure.
- Pre-stored recorded messages can be heard when callers visit and press the button on the external intercom station.
- Freedom can be remotely activated via Possum and other IR controllers.
- Headphones can be provided to enable private telephone conversations.
- In cases where users have quiet voices an external microphone is available.

### The Main Components:

# Freedom

## Wireless Telephone & Intercom System

### Configuration within an Environmental Control System (ECS)

For full use within an Environmental Control System as a multi-room intercom, loud speaking telephone and door release control.

*Please note: User Intercom/Telephone not required when used with Possum Vivo! remote controller.*

### Stand-Alone Door Entry & Telephone System

Alternatively, for those who do not require an EC system, the intercom, door release and answer telephone functions can be activated via the two direct access buttons on the User Intercom/Telephone Unit or by using two switches. Freedom then becomes an entirely stand-alone door entry system with the ability to answer the telephone as well.

 Possum Controller  
 Possum Freedom Wireless Telephone/Intercom System

### Internal Intercom & Telephone

For those requiring only internal intercom and telephone capabilities (no provision for external intercom, door lock releases).
