

Rapid Deployment Wireless Nurse Call Systems

During these unprecedented times Possum are offering the following self-install out of the box emergency solutions which can be up and running within 7 days of an order. All systems come with three pagers. This means Care Staff can work as usual and receive alerts to a pager which can be carried with them.

EASY SELF INSTALL

Wireless systems allow a quicker, less disruptive and less expensive install.

SUITS A RETRO FIT

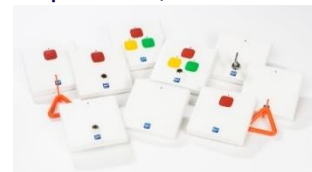

Wireless solutions are ideal when retro-fitting a Nursecall system.

PRE-PROGRAMMED

The systems can be pre-programmed and couriered out across the UK for installation by Local Authority Telecare installers with free remote telephone support available from Possum engineers if required.
