

Rapid Deployment InfoPager Receiver & Docking Station

During these unprecedented times Possum are offering the following self-install out of the box emergency solutions which can be up and running with 7 days of an order.

The Rapid Deployment InfoPager Receiver & Docking Station system is pre-programmed and comes with simple instructions to set it up.

EASY SELF INSTALL

The system is couriered to you with full installation instructions.

SUPPORT AVAILABLE

Possum engineers are available to provide free remote telephone or video call support if required.

PRE-PROGRAMMED

The system is pre-programmed and couriered out across the UK for installation by a carer or relative.

How it works:

The system can be used to ask for non-urgent assistance or to call for emergency help.

A single press of the user switch will send an **Assistance Alarm** to the Infopager. The pager will emit 4 beeps until acknowledged by the pager.

Pressing and holding the user button will send an **Emergency Alarm** to the Infopager. The pager will sound a siren until it has been acknowledged by the carer.

The InfoPager is a portable receiver which the carer can keep with them. When not required it can be placed in the docking station to be recharged.

For more information, please contact us on: 01296 461 000 or info@possum.co.uk or visit <http://possum.co.uk/>
Further configurations available. We can provide installation at a nominal fee.
