

Introducing Combi 4

A simple and easy to use controller consisting of 4 buttons, with the option of having up to 8 different commands via Infra red or Radio!

The Combi 4 is a 2 in 1 button solution allowing multiple commands through either short or long presses.

The Combi 4 also has onboard scanning via a switch for those with less motor dexterity.

The Combi 4 is programmed via an Android App, offering simple step by step programming which is easily configured.

How it works...

The Combi 4 can work in 2 different ways:

Scan mode

the user presses a button to scan through the options. If more than 4 commands are programmed, the scan goes round twice, which changes the led light colour to show you are on a second level, this happens in a clockwise direction starting from the pink button. For those that need auditory prompts this is also available in scanning mode.

Direct Access mode

a short press completes one command while a long press controls another command per coloured button. Tactile feedback is also available if the user needs the reassurance the button has been pressed.

For example, pressing the yellow button quickly turns the TV on/off, while a longer press changes channel.

Part Numbers

034-990 Combi 4 with PSU

034-982 Spare power supply for Combi

035-432 Wireless charging dock and cable

Further Information

Features and Benefits

- 2 week battery life*
- Option to have between 1-8 commands
- Auditory notifications including low battery warning and switch disconnection
- Scan function - 1 or 2 switches
- Auditory scanning
- Glide and Sticky Scanning operation
- Macro Infra-red phone number
- Pre-programmed Infra-red library of Possum and GEWA codes
- Transmits both Neat and Tunstall radio protocols
- Compatible with any standard mono or stereo 3.5mm accessibility switch
- Wired and wireless charging available
- Mounting option
- Moisture resistant
- Medical device conforming to EN 60601-1 Class 1
- Lightweight device
- Programmed via an easy to use Android App via Bluetooth
- LED indicator
- Compatible with NEAT range, meaning the Combi 4 could alert a carer via a pager
- Lithium - Ion Battery
- Easy to mount via 1/4" UNC (Camera Mount)

*If receiving radio signals from telecare devices the battery life will be reduced

Dimensions and specifications

Width 73mm
 Height 116mm
 Depth 30mm
 Weight 150g

Activation Force of inbuilt button: 110g
 Radio Frequencies (RF) Tx & Rx 869.2Mhz
 Bluetooth 5 LE 2.4 GHz
